CPSC 482 Capstone Senior Design (Computer Science) Final Project Presentation Evaluation Rubric

Design Process and Research Products	0	1	2
Is the problem clearly stated? Are needs & requirements articulated?			
Were design alternatives considered? Is the rationale for choosing between alternatives clear?			
Is the system-level functional description well thought-out and sound?			
Is each component well-designed?			
Was feedback elicited and data gathered?			
Was the data analyzed to advance formative and summative understanding?			
Was the analysis fed back to iterate the design?			
Is the final product functional?			
Is the experience compelling?			
Is the work original?			
Are generalized implications for design articulated?			
Are the seeds of a meaningful research contribution developed?			
Do the students demonstrate in-depth knowledge about the project?			
Was there evidence of effective teamwork?			

Presentation	0	1	2
Are the presenters well-prepared?			
Is the presentation logically organized? Do the presenters make the progression clear through their talk?			
Do the slides present material in an informative and engaging manner?			
Do the presenters appear to be spontaneous and fluid?			
Do the presenters use the allotted time wisely?			
Is there a balance between high–level motivational material and technical detail?			
Do the presenters respond well to questions and critique?
